CRYSTALLINE SILICA FREE

VITRUM SURFACES

STYLISH AND DURABLE

VITRUM surfaces is non-porous, non-staining and requires virtually no maintenance. VITRUM surfaces is also stain resistant from most household products including fruit juice, tea, coffee, wine, liquid food dyes, water based markers, nail polish, etc. Its low absorption rate, makes it a very hygienic surface, easy to clean and maintain. VITRUM surfaces can be cut and installed to the exact specifications required by the customer; there is no sealing required on all polished surfaces and no maintenance other than normal cleaning.

CARE & MAINTENANCE

Daily cleaning is the simplest way to keep VITRUM surfaces shiny and radiantly beautiful for years. For general cleaning use a damp cloth with a cream cleanser and then, rub gently.

TEN YEAR LIMITED WARRANTY

VITRUM surfaces will retain its integrity and remain free from manufacture defects for a period of 10 years commencing from the date of installation.

The colour of each slab is dependent on the natural materials as well as the colours mixed within the resin binder. As with any product made from mainly natural materials there can be variations in background, colour and pattern, as well as pigment concentration and distributions. For this reason and to view any potential defect, VITRUM surfaces recommends removing protective film before cutting. Inspection of the stone while "setting out" in the factory and before gluing benchtops on site is also recommended.

Please refer to the information detailed on the Warranty and Care & Maintenance card available online at www.vitrum.com.au
